SUMMARY

Final-year Computer Science Engineering student with hands-on full-stack experience in Python, Django, and REST APIs, plus applied AI/NLP work building and shipping a resume-screening tool. Comfortable across the stack — from Django ORM and SQL on the backend to responsive JavaScript UIs on the front end — with working exposure to Git-based Agile workflows, unit testing, and AWS deployment.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, JavaScript

Frameworks & Libraries: Django, Django ORM, Flask, HTML, CSS

Tools & Platforms: MySQL, Git/GitHub, AWS, Postman, pytest, scikit-learn

Practices: REST API Design & Documentation, Agile/Scrum, Unit Testing, CI/CD Basics

Core Areas: Full Stack Development, NLP, Data Analysis

EXPERIENCE

UI Developer — TVK Technologies

- Cut manual data-entry steps by an estimated 30% by integrating 4 RESTful Django APIs to connect front-end components with backend services, validating each endpoint with Postman
- Improved average page load time by roughly 20%, debugging and profiling 10+ layout and performance issues across existing pages during Agile sprint cycles
- Shipped 5+ client-facing pages/modules with full cross-browser compatibility by building responsive front-end interfaces in HTML, CSS, and JavaScript

AI Intern — Novalis Infotech

- Built and evaluated 3 supervised learning models (classification and regression) using scikit-learn and structured feature-engineering workflows during a one-month applied AI internship
- Delivered 5 assigned tasks and mini-projects on schedule with zero missed deadlines by applying prompt design and model evaluation concepts to practical use cases

PROJECTS

Resume Screener

GitHub: github.com/vishnuprasath2406/resume-screener

- Built an AI-powered Flask web app that scores resumes against job descriptions in under 2 seconds using TF-IDF vectorization and cosine similarity, with core scoring logic covered by pytest unit tests
- Designed a role-to-skill expansion system covering 20+ job titles, enabling search by title alone and removing the need to type full job descriptions
- Implemented PDF/DOCX parsing (pdfplumber, python-docx) and a responsive, animated frontend, delivering match-score verdicts in under 3 seconds across 50+ test resumes
- Documented API endpoints with a Postman collection and deployed the app on AWS EC2 for live demo access

EDUCATION

- **B.E, Computer Science Engineering** — Adhiparasakthi Engineering College (2027) | CGPA: 8.05
- **HSC** — Velammal Matriculation Hr Sec School (2023) | 72.3%
